St. Joseph's Institute of Technology
DEPARTMENT OF I.T/CSE
CS6502 - OBJECT ORIENTED ANALYSIS AND DESIGN

ASSIGNMENT III QUESTIONS

UNIT III

PART A

1. What is an association?
2. What is exclude relationship?
3. How to Create a Domain Model?
4. What is qualified association?
5. List the relationships used in class diagram.
6. What is composition?
7. When are Description Classes useful?
8. What is generalization relationship?

PART B

1. Explain with an example, how use case modeling is used to describe functional requirements.

2. Explain in detail about domain model refinement.

3. Write briefly about elaboration and discuss the differences between elaboration and inception with an example.

4. Describe the strategies used to identify conceptual classes. Describe the steps to create a domain model used for representing conceptual classes.
